

Sample PDF for Testing - Employment Statistics

This PDF contains employment rate statistics for testing text extraction, chunking, and querying. Below is a table with unemployment rates by degree type and year. You can use this data for testing your RAG pipeline and LLM integrations.

Degree Type	2018	2019	2020
High School	4.1%	3.8%	5.0%
Associate Degree	3.0%	2.8%	4.1%
Bachelor's Degree	2.5%	2.4%	3.7%
Master's Degree	2.2%	2.1%	3.4%
Doctoral Degree	1.6%	1.5%	2.5%

Conclusion: This PDF simulates real-world data with both structured tables and descriptive text. It is ideal for testing RAG-based pipelines that involve extracting text, embedding chunks, and retrieving answers based on user queries.
